

S-TYPE OIL COOLER KIT for NA

HKS Oil Cooler Kit for 86/BRZ NA is now available!
This Kit includes all parts you need, such as air guide or bracket so it can be installed to 86 and BRZ without big modification.

【Features】

- This kit makes it very easy to install because the core is installed in front of the radiator and all the parts needed are included such as bracket, air guide and hose. And also it doesn't need much of modification for the vehicle.
- There are special spacer and center bolt included for installation of attachment.
- By using the thin 15 step core, it's much easier to install and at the same time have the cooling capability.
- This kit is for NA layout. (For supercharger is under development)

【The characteristics of oil temp. and the water temp.】

* The test result might be different on different time and place.
