

# SUPER EXHAUST SYSTEM for 86/BRZ

Hi-Power Spec-L

Front Pipe Metal Catalyzer

4-2-1 Manifold

## Full exhaust system from exhaust manifold to muffler

Full exhaust system of "SUPER MANIFOLD with CATALYZER R-SPEC" that has a new layout design of a straight catalyzer at the exhaust manifold, with front pipe with HKS metal catalyzer, and super-light and high-efficient "HiPower SPEC-L" Compatible for Japan exhaust regulation and acceleration noise regulation.

### [FEATURES]

- It will have great performance around 3,000PRM because we adopted 4-2-1 layout manifold which improves output at normal and high RPM range. And also because of the metal catalyzer, it will perform great at high RPM because of the less exhaust pressure.
- There is no need for parts modification for installation. So it will take about 1h to 2h.

## TOYOTA 86 SUBARU BRZ

Model	ZN6 ZC6
Engine	FA20
Model Year	2012/04~

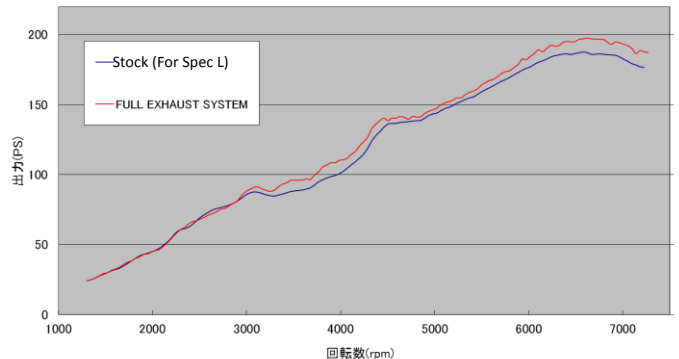

Code No.	32025-AT001	
Price		

	Stock	HKS
Material	SUS430	SUS304
Pipe Diameter	φ60	φ60
Layout	4-2-1	4-2-1

\* Only for MT

\* Only factory settings will be compliant for Japanese safety stan
