

Fine Tune V Belt

★6PK-2075 for 86 & BRZ and 7PK-2109 for R35(VR38) are newly added to the application. Additionally, this belt for HKS GT Supercharger for CR-Z is available.

■Features

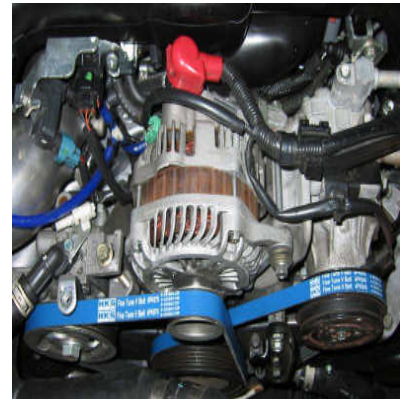

- Using the latest in belt technology gives the following benefits:
 - Increased durability at high temperatures which can be found in the engine bay of tuned vehicles.
 - Increased performance in cold weather areas and conditions.
 - Lightweight with good friction tolerance properties means that excess tension is not required whilst anti sound properties reduces belt squeal.
- ※ Back face is colored blue with HKS logo.
 - Blue, which is used in HKS intake hose was selected for coordination across the whole engine bay.
 - Uses colored nylon fabric for good anti color fading properties.
 - HKS logo, product name and belt length are printed on each belt.
- ※ Back face of the belt for HKS GT-Supercharger is colored black.

■Fine Tune V-Belt

Code No.	Model	Price
24996-AK001	FINE TUNE V-BELT/3PK875

24996-AK030	FINE TUNE V-BELT/6PK2075	
24996-AK031	FINE TUNE V-BELT/7PK2109	

※4PK806 is applicable only for vehicles equipped with stretch fit belts.
 ※The V-belt for HKS GT-SUPERCHARGER is black type.

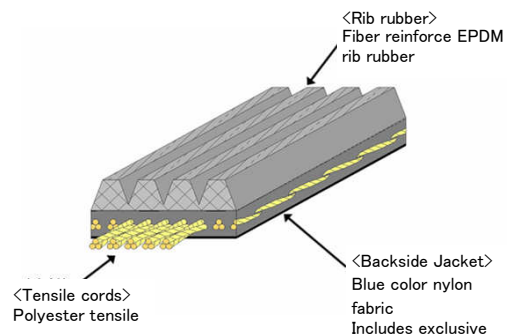

※Vehicle application charts available separately.

■Performan

☆EPDM (Ethylene Propylene Diene Monomer) Rubber was selected because:

- Better durability and performance in hotter and colder conditions with improved friction tolerance.
- Much lighter than previous version belts.
- Shirt fiber mixture in rib rubber improves performance over previous version.

Performance comparison with general stock belt.

High temperature durability	Low temperature durability	Wear and abrasion resistance	Weight
4 times greater	10 times greater	30% improvement	17% lighter

※ Button bolt is added to 24996-AK012 (5PK875) and 24996-AK013 (5PK885).

- Clearance between the stock v-belt and alternator adjustment bolt of some vehicles that applicable to these part numbers above may be too narrow so the v-belt may come in contact with those parts. Replacing the alternator bolt with the provided button bolt may prevent the belt abrasion.
