GT SUPERCHARGER Z33(VQ35DE) GTS8555 GTSC Pro Kit

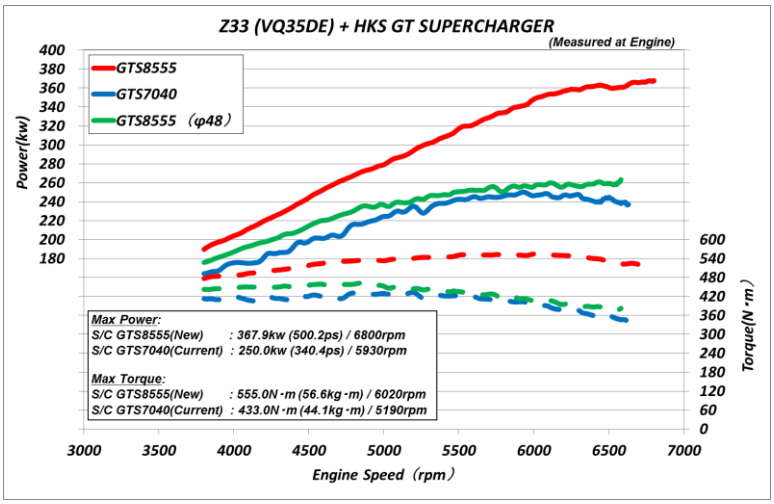
Over 500HP with Z33!!

This kit can achieve over 500hp if the engine is strengthened, and better torque and power than GTS7040 kit with a stock engine. Better performance than competitor's kit is guaranteed!!

【Features】

- The intercooler size is doubled compared to the existing kit. The capacity is doubled as well to withstand
- The diameter of the suction pipe and intercooler pipe is enlarged by 35%.
- The airflow capacity of the supercharger is increased by 30% compared to the existing kit (GT7040).
- With adequate airflow, the torque & power increase are noticeable from the low to high speed range!!

【Performance】



※ This graph shows the in-house test results. The result may vary depending on the measuring instrument and/or a seasonal temperature.

【Note in order to install this kit】

・S/C Pulley: Prepare φ100 or φ110 supercharger pulley depending on the target output.
・Prepare a engine management system such as HKS F-CON.
・Belt: Prepare a belt matches with the supercharger pulley.
・Select the spark plug which heat range is appropriate to the vehicle specifications.
・Fuel Parts: HKS Fuel Upgrade Kit which is designed to withstand 500hp.
