

RACING MUFFLER SILENCER Ver.

NISSAN GT-R (CBA,DBA-R35)

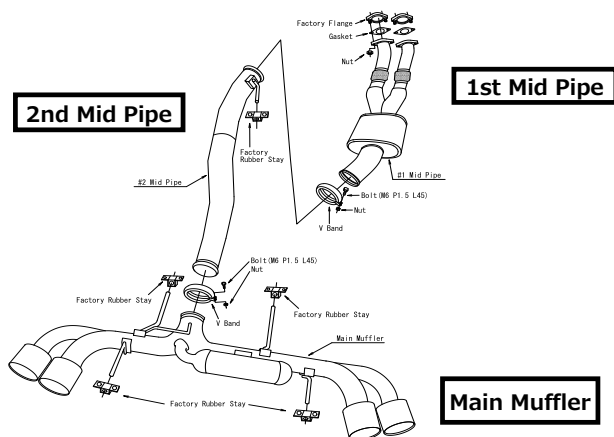

Code No. 31008-KN002

Ultimate High Performance Withstanding 1000PS+

- This exhaust system was designed to reduce the exhaust pressure to an extremely low level. The target was set to the racing vehicle with over 1000ps engine output.
- The maximum pipe diameter is 101.6mm. The exclusive design pipe after the stock secondary CAT eliminates the restriction by the stock flange and increase the engine output to a higher level.
- Sound level and tone are tuned to deliver comfortable racing exhaust sound.

Fully Tested With "HKS GT1000 Racing Spec"

- This product was tested with a vehicle with over 1000ps engine output to ensure its high performance. The exhaust pressure did not rise at a high engine RPM; therefore, further tuning for higher performance is still possible.

Model (Engine)	CBA,DBA-R35 (VR38DETT)
Model Year	2007/12~
Main Material	SUS304
Tip O.D.	φ124
Main Pipe Dia.	φ74.7×2→φ101.6→φ85×2
Closed Noise (Noise Level @ Idling)	109dB (A) (※when using with HKS GT1000)
Ground Clearance	110mm (Mid Pipe)
EX Pipe Ground Clearance (Partial)	110mm (Mid Pipe)
	※Ground Clearance is -15mm of the stock.
