

HONDA FIT RS・HYBRID RS (DBA-GE8、DAA-GP4)

Code No. 32016-AH029

The main concept is 「Lightweight」

We have reduced 40% of the weight from the stock muffler. (Stock:4.95kg, SPEC L: 3.05kg)
We didn't reduce the sound absorbing material but made the pipe and silencer much lighter.

We made standard cannonball type design for more aggressive look!

In these days the cannonball type silencer is nothing new, but we have made it new with much lighter muffler. And also we put carbon in the tail-end. It will give you the performance and appearance.

Model (Engine)	DBA-GE8・DAA-GP4	
Model Year	2007/10～	
JQR Number	JQR10121111	
Main Material	SUS304	
Tip O.D.	φ 94	
Main Pipe Dia.	φ 50.8	
Close noise level (Noise Level @ Idling)	Stock	77dB (Idling: 54dB) / RS late model CVT
	HKS	85dB (Idling: 59dB) / RS late model CVT
Ground clearance of item	185mm(main shell)	
EX Pipe Ground Clearance (Part)	145mm(stock center pipe)	
Remarks	RS early model 5MT/RS later model 6MT Hybrid RS CVT is out of Japanese acceleration noise level limitation.
