

# OB-LINK

OB-LINK extracts vehicle data from the on board diagnostics port (OBD) and sends it via Bluetooth to an Android device (Tablet/Smartphone etc.)

Data is sent to an Android device via Bluetooth link

Extract vehicle data by connecting OB-Link to the vehicle on board diagnostics port

## 【App】

OB-LINK Data sent from the OB-LINK can be viewed using an app called "Carscope" (※) for Android devices. This allows viewing of vehicle maintenance data and other parameters ※"Carscope" can be downloaded from Google Play

### Car Chart

Enter vehicle maintenance schedule and message will be displayed to remind you of the next service

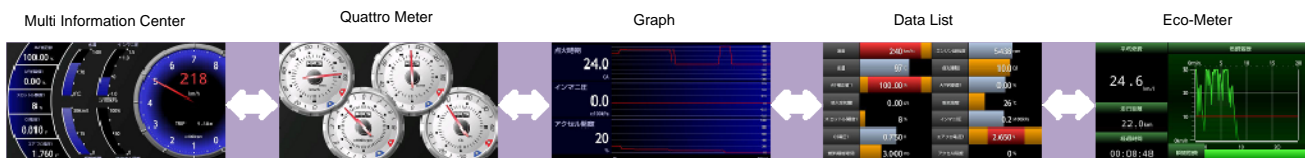

### OBD Fault Code

If a fault code is found then the icon is displayed in real time at the bottom left of the screen. tapping the icon shows details of the error code

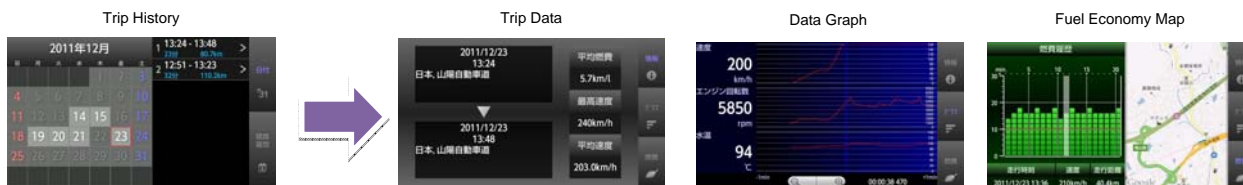

### Real Time Meter

Displays vehicle data in real time View modes can be switched with left or right flicks or tapping the indicators on the left or right of the screen.

### History List

Past data is listed and tapping shows detail of each trip. long tap can delete the record.
