

## S-TYPE OIL COOLER KIT for 86/BRZ [NA]

HKS Oil Cooler Kit for 86/BRZ NA engine was redesigned and is now offered at more affordable price. Installation requires no major modification. All necessary parts for installation are included in the kit.

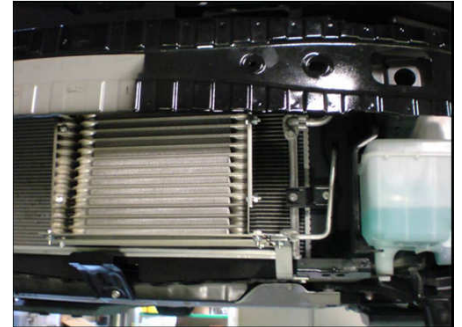

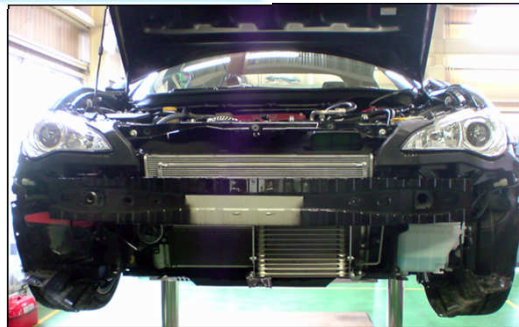

### [Features]

- Newly designed single tube type fitting.
- From engine bench tests and experience from D1 racing it is found that the oil pressure of the FA20 engine is extremely high compared to the conventional mass-produced engines. (Max oil pressure: over 12kgf/cm<sup>2</sup>) New single tube fitting withstanding the high oil pressure was newly designed and included in the kit.
- Including the pre-assembled hose, bracket, and air guide and locating the core in front of the radiator enable an easy installation. Also, there is no major modification required to the chassis.
- Special spacer and center bolts were designed exclusively for this kit to install the oil cooler attachment without modification.
- The thin 15-layer core improves the cooling performance and makes installation easier.
- This kit is applicable only to the NA engine.(A kit for the supercharged engine is under development)

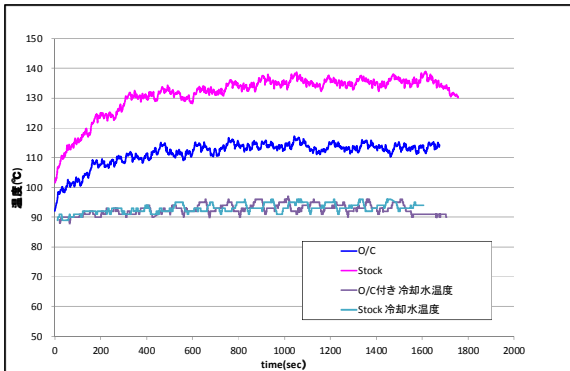

### [Kit Parts]

- The following parts are included:
  - Oil Cooler Core
  - S-type Attachment
  - Spacer
  - Center Bolt
  - Banjo
  - Banjo Bolt
  - Bracket
  - Air guide
  - Accessory Parts

### [The characteristics of oil temp. and the water temp.]

※This is the result of the test HKS conducted.  
The result may vary depending on the test conditions.

### ● Test Data

Test Vehicle: TOYOTA 86  
Specifications: LEGAMAX Premium / Premium Suction  
Test Course: Fuji International Speedway Racing Course  
Weather: Sunny Temperature: 27°C

※The oil temperature of a vehicle without the oil cooler reached 140°C 5 minute after start driving the course, and the vehicle had to go slow to cool the oil temperature down.

The oil temperature of a vehicle with HKS Oil Cooler was maintained around 115°C through the 30 min test drive without any trouble.

### ● S-TYPE OIL COOLER KIT

Vehicle	Model	Engine	Year	Core Size/WxHxD·Row	Core Location	Type	Hose Size	AI Air Guide	Code No.	Price	Remarks
86 BRZ	ZN6 ZC6	FA20	12/03~	200x200x32 15-row	Front of Radiator	S-TYPE	#10	Yes	15004-AT010		Only for NA. BRZ w/AT not confirmed. Minor modification (e.g. Bending A/C pipe) is required.
